

Conflict
Minerals
Report

Interlink Electronics

Calendar Year 2016

INTERLINK ELECTRONICS, INC.

Conflict Minerals Report For the Calendar Year Ended December 31, 2016

1. Introduction

This Conflict Minerals Report (“Report”) of Interlink Electronics, Inc. has been prepared in accordance with Rule 13p-1 under the Securities Exchange Act of 1934 (“Rule 13p-1”) for the reporting period January 1, 2016 to December 31, 2016. As used in this Report and unless otherwise expressly stated or the context otherwise requires, all references to “Interlink,” “we,” “our,” “Company” and similar references are references to Interlink Electronics, Inc. and its consolidated subsidiaries.

Rule 13p-1 was adopted by the Securities and Exchange Commission (“SEC”) to implement certain disclosure requirements related to minerals specified in the rule. The specified minerals are gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, which are limited to tantalum, tin and tungsten, and are referred to in this Report as “conflict minerals”. Rule 13p-1 requires disclosure of certain information when a company manufactures or contracts to manufacture products for which conflict minerals are necessary to the production or functionality of those products. If conflict minerals are necessary, the registrant must conduct a reasonable country of origin inquiry (“RCOI”), to determine whether any conflict minerals originated in the Democratic Republic of the Congo or any adjoining country (collectively, the “Covered Countries”), or are from recycled or scrap sources.

2. Company Overview

Interlink designs, develops, manufactures and sells a range of force-sensing technologies that incorporate our proprietary materials technology, firmware and software into a portfolio of standard sensor-based products and custom sensor-system solutions. These include sensor components, subassemblies, modules and products that support effective, efficient cursor control and novel three-dimensional user inputs. Our human machine interface technology platforms are deployed in a wide range of markets including consumer electronics, automotive, industrial, and medical.

3. Conflict Minerals Policy

We have adopted a Conflict Minerals Policy that states our commitment to ethical business conduct and the responsible sourcing of minerals through our global supply chain. The Conflict Minerals Policy is available on our website at www.interlinkelectronics.com under “Investors—Corporate Governance.”

4. Supply Chain and Reasonable Country of Origin Inquiry

We determined that certain conflict minerals are necessary to the functionality of one or more of our products that we manufactured or had manufactured during the Reporting Period, and thus conducted a reasonable country of origin inquiry to determine whether any conflict minerals necessary to the functionality or production of such products originated in the Covered Countries or are from recycled or scrap sources. We established an internal team responsible for the

reasonable country of origin inquiry, which included employees involved with material procurement. We also engaged a third-party consulting firm, Source Intelligence, to assist with the collection of information about the presence and sourcing of conflict minerals used in the products and components supplied to us.

We contract with numerous suppliers that contribute to the manufacture of our products, and are several levels removed from the smelters or refiners (“SORs”) that process the minerals used in our products and from the mines of origin for those minerals. Interlink does not purchase raw ore or unrefined conflict minerals, and we made no purchases in the Covered Countries. As a result, in conducting our RCOI, we necessarily relied upon our suppliers to provide conflict minerals sourcing information and identify those SORs that represent the sources of conflict minerals in our supply chain.

4.1 Reasonable Country of Inquiry Process

The RCOI began with an evaluation of our suppliers who provided materials, components or products that became part of products we manufactured or contracted to be manufactured in 2016 which contained or were likely to contain conflict minerals necessary to the production or functionality of those products. Through this evaluation, we identified 57 suppliers (“Identified Suppliers”) who provided us with materials, components or products in 2016 to be contacted as part of our RCOI.

We contacted each of the Identified Suppliers by introductory email containing a registration and survey request link for an on-line data collection platform. The Identified Suppliers were asked to provide information about the presence and sourcing of conflict minerals used in the products and components supplied to Interlink, with the ultimate objective of identifying for any conflict minerals the SORs and the associated mine countries of origin. To collect this information, we utilized the Conflict-Free Sourcing Initiative’s (“CFSI”) Conflict Minerals Reporting Template (CMRT), versions 3.0 or higher. If an Identified Supplier failed to respond to our request for information or provided an incomplete or insufficient response, we sent follow-up inquiries requesting a complete response. In addition, supplier responses were evaluated for plausibility, consistency and gaps, and Identified Suppliers were contacted if any of the following quality control issues were identified:

- One or more SORs were listed for an unused metal;
- SOR information was not provided for a used metal, or SOR information provided was not a verified metal processor;
- The supplier answered yes to sourcing from the Covered Countries, but none of the SORs listed are known to source from the region;
- The supplier indicated that they had not received conflict minerals data for each metal from all relevant suppliers;
- The supplier indicated that they had not identified all of the SORs used for the products included in the declaration scope;
- The supplier indicated that they had not provided all applicable SOR information received; or

- The supplier indicated 100% of the conflict minerals for products covered by the declaration originated from scrap/recycled sources, but one or more SORs listed are not known to be exclusive recyclers.

4.2 Survey Responses

The response rate among the Identified Suppliers was 67%. Of these responding suppliers, 45% indicated one or more of the conflict minerals as necessary to the functionality or production of the products they supply to Interlink. From the survey information provided by those responding suppliers indicating the presence of conflict minerals, and based on the SOR database maintained by Source Intelligence, there is an indication that 64 out of 300 verified SORs sourced conflict minerals originating in the Covered Countries.

Consequently, Interlink has concluded that certain of its products in calendar year 2016 contain conflict minerals that may have originated in the Covered Countries and were not from scrap or recycled sources.

For those supply chains with SORs that are known or thought to be sourcing conflict minerals in the Covered Countries, additional investigation is needed to determine the source and chain-of-custody of the conflict minerals. For this reason, and because only 67% of the Identified Suppliers responded to our RCOI request for information, we are unable to determine whether any conflict minerals in products that we manufactured or had manufactured in 2016 financed or benefited armed groups in a Covered Country. However of the 64 SORs that have been identified all have been certified Conflict Free by Third Party audit.

4.3 SOR Summary

In response to our RCOI, our responding suppliers identified 300 SORs in their CMRTs which may have processed conflict minerals contained in materials, components or products provided to us. A list of these SORs is set forth in Annex I. We cross-referenced these SORs against the list of facilities that have received a “conflict free” designation from the Conflict-Free Smelter Program (“CFSP”) and its cross-recognized programs (e.g. the Responsible Jewellery Council and the London Bullion Market Association), whose designations provide country of origin and additional due diligence information on the conflict minerals sourced by such facilities. Of these 300 identified SORs only 64 SORs were identified as sourcing from Covered Countries, as of April 21, 2017. A list of these is set forth in Annex II:

- 63 of these SOR’s have received a “conflict free” designation from the CFSP and are considered “compliant”;
- 1 of these SOR’s has ceased operations as of April 2016: and
- none of the SORs are not currently actively participating in the CFSP

Under the CFSP’s standards, “compliant” means a facility has been audited and found to be compliant with the relevant CFSP protocol, and “active” means a facility that is engaged in the program but has not yet been found to be compliant.

Each of the 63 SORs that we believe may source conflict minerals from the Covered Countries has received a “conflict free” designation from the CFSP with 1 having ceased operations.

5. Risk Mitigation Efforts

Interlink believes that the Subject Minerals contained in our products originate from the countries listed in Annex III below, as well as from recycled and scrap sources.

Interlink intends to undertake the following additional steps to continue to mitigate any possible risk that the necessary conflict minerals in our products could benefit armed groups in the Covered Countries:

- Encourage Identified Suppliers to provide additional, product-level information through ongoing communications with them;
- Engage Identified Suppliers that provided incomplete responses, or failed to provide a response, for the Reporting Period to ensure that such suppliers provide a complete response for the calendar year ended December 31, 2017;
- Continue to conduct and report annually on supply chain RCOI for the applicable conflict minerals;
- Continue to refine our risk management strategy based on the results of our RCOI efforts; and
- Communicate to any new suppliers our expectations with respect to conflict minerals, including through delivery of our Conflict Minerals Policy and our supplier qualification and assessment process

Annex I
SMELTERS AND REFINERS IN SUPPLY CHAIN

300 Smelters Or Refiners (SOR's) Reported In Interlinks Supply Chain For 2016

Annex II
SMELTERS AND REFINERS SOURCING FROM COVERED COUNTRIES

63 Smelters Or Refiners (SOR's) Reported In Interlinks Supply Chain Who Source Metals from Covered Countries but are Certified Conflict Minerals Free by Third Party Audit For the Year 2016

Metal	SOR Name	Smelter ID #	Country location of SOR
Gold	Almalyk Mining and Metallurgical Complex (AMMC)	CID000041	Uzbekistan
Gold	Mitsubishi Materials Corporation	CID001188	Japan
Gold	Asaka Riken Co., Ltd.	CID000090	Japan
Gold	Nihon Material Co., Ltd.	CID001259	Japan
Gold	Elemetal Refining, LLC	CID001322	United States
Gold	CCR Refinery - Glencore Canada Corporation	CID000185	Canada
Gold	Prioksky Plant of Non-Ferrous Metals	CID001386	Russian Federation
Gold	Jiangxi Copper Company Limited	CID000855	China
Gold	Rand Refinery (Pty) Ltd.	CID001512	South Africa
Gold	Samduck Precious Metals	CID001555	Korea, Republic of
Tantalum	Zhuzhou Cemented Carbide Group Co., Ltd.	CID002232	China
Tantalum	Global Advanced Metals Aizu	CID002558	Japan
Tantalum	Global Advanced Metals Boyertown	CID002557	United States
Tantalum	Guangdong Zhiyuan New Material Co., Ltd.	CID000616	China
Tantalum	H.C. Starck Co., Ltd.	CID002544	Thailand
Tantalum	H.C. Starck Tantalum and Niobium GmbH	CID002545	Germany

1 Smelters Or Refiners (SOR's) Identified In Interlinks Supply Chain During 2016 But Subsequently Determined to have ceased Operation

Metal	SOR Name	Smelter ID #	Country location of SOR
Tin	PT Justindo	CID000307	Indonesia

Annex III
COUNTRIES FROM WHICH SUBJECT MINERALS SOURCED

Interlink believes that the Subject Minerals contained in its products originate from the countries listed below, as well as from recycled and scrap sources.

Angola	Guyana	Peru
Argentina	Hong Kong	Philippines
Armenia	Hungary	Poland
Australia	India	Portugal
Austria	Indonesia	Recycle/Scrap
Belarus	Ireland	Russian Federation
Belgium	Israel	Rwanda
Bermuda	Italy	Saudi Arabia
Bolivia	Japan	Sierra Leone
Brazil	Jersey	Singapore
Burundi	Kazakhstan	Slovakia
Cambodia	Kenya	South Africa
Canada	Korea, Republic of	South Sudan
Central African Republic	Kyrgyzstan	Spain
Chile	Laos	Suriname
China	Luxembourg	Sweden
Colombia	Madagascar	Switzerland
Congo (Brazzaville)	Malaysia	Taiwan
Czech Republic	Mali	Tajikistan
Djibouti	Mexico	Tanzania
DRC- Congo (Kinshasa)	Mongolia	Thailand
Ecuador	Morocco	Turkey
Egypt	Mozambique	Uganda
Estonia	Myanmar	United Arab Emirates
Ethiopia	Namibia	United Kingdom
Finland	Netherlands	United States
France	New Zealand	Uzbekistan
Germany	Niger	Viet Nam
Ghana	Nigeria	Zambia
Guinea	Papua New Guinea	Zimbabwe
